

Pneumatic Dust Collection System

OVERVIEW

MPI's pneumatic 30-gallon vacuum is ideal for controlling dust during underground drilling. It easily connects to any King Cobra Dust Head roofbolter or Z Drill.

FEATURES

Helps control the air quality in underground workings

Air displacement of 135 cfm

Air-powered

No moving parts

Reusable filters

Durable

Light weight

Low maintenance

MPI-DCS001	
Maximum Air Pressure (psi)	90 psi @ 50 cfm
Minimum Air Pressure (psi)	50 psi @ 35 cfm
Air Line	1" diameter or larger
Air Displacement (cfm)	135 - 125
Lid Assembly Weight (lbs)	16
Noise Level (dBA)	95
Equipment Connection	1" cam lock fitting
Drill Connection	Dust Collection Head
Maintenance:	Drill operator to empty unit 2 times per shift

Using a water separator is recommended on air supply line. Unit is also available with 55 gallon tank.
