

Power Hacksaws

OVERVIEW

On-site cutting of pipe up to 24" OD and structural steel

MPI's power hacksaws offer a wide range of options for portable cutting of pipe, structural steel, tanks, and other materials. Our saws are designed for the toughest service in refineries, power plants, utilities, offshore oil, construction and demolition applications and are ideal for shutdowns and turnarounds in process piping industries. MPI's power hacksaws are safer than cutting with a welding torch in hazardous areas or confined spaces.
